To: United Motorcoach Association Members  
From: Bruce Hyatt, National Accounts Manager, Petro-Canada Lubricants  
Re: Lubricants Supply Program

Dear UMA Member:

Petro-Canada Lubricants is pleased to announce an exclusive lubricants supply program to be offered to all United Motorcoach Association members.

Petro-Canada has more than 25 years experience producing exceptional performing lubricants that save our customers money. We use the patented HT purity process to produce 99.9% pure, crystal-clear base oils to the highest standards. The base oil is the foundation of our premium lubricant which leads the industry in dispersing engine soot that can damage pistons, rings, liners and bearings. Furthermore, our base oil quality insures superior performance in extreme cold and hot operating temperatures.

We can supply your fleet operation with a wide variety of premium lubricants in all package sizes to suit the needs of the strenuous duty cycle of a motor coach fleet. Our representatives will recommend the correct product for each application with the goal of maximizing drain intervals and component duty cycle. Petro-Canada has many years of direct OEM experience. We have factory fill agreements with such large businesses as International Truck, General Motors, Ford and many others.

Products may be ordered through our local distributors to insure efficient service and billed through Petro-Canada so that the purchasing power of your entire group will be utilized. I have attached a current price sheet for your review.

Petro-Canada looks forward to servicing your lubricant needs and will work hard to save your company valuable maintenance dollars. Our local representatives will be in contact with you in the very near future. Should you have immediate needs or require more information, please contact our National representatives:

For US call – Bruce Hyatt (518)-441-9879

We look forward to speaking to you and servicing your lubricants needs!
